

VOICEME

Digital Trust Simplified

voiceme

voiceme is the platform that generates **inviolable** digital identities

We transform the Brand-Customers digital interactions into an **effortless** and **riskless** relationship

every **2 seconds** a digital identity **is theft**

due to users' passwords weakness

why do people choose **weak passwords**?

this is a strong password

J3K!z@Rqp#

We need a solution that generates
inviolable digital identities, *easy* to
create, remember, and use

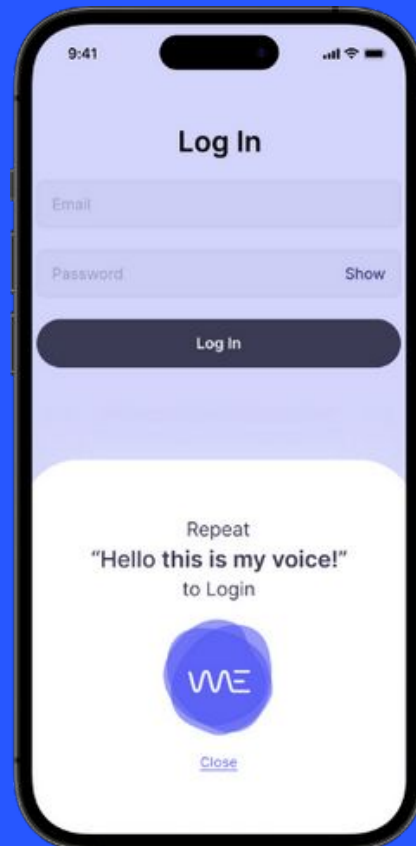

One Platform, Five Modules

01

VoiceKey

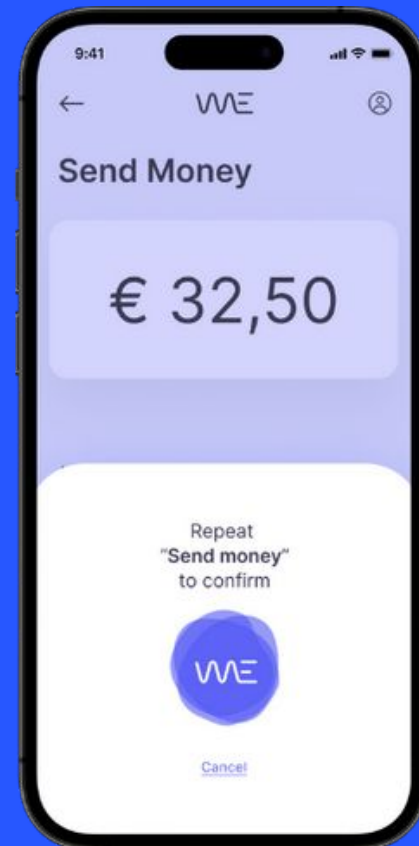

ACCESS TO DIGITAL PROPERTIES

02

VoicePay

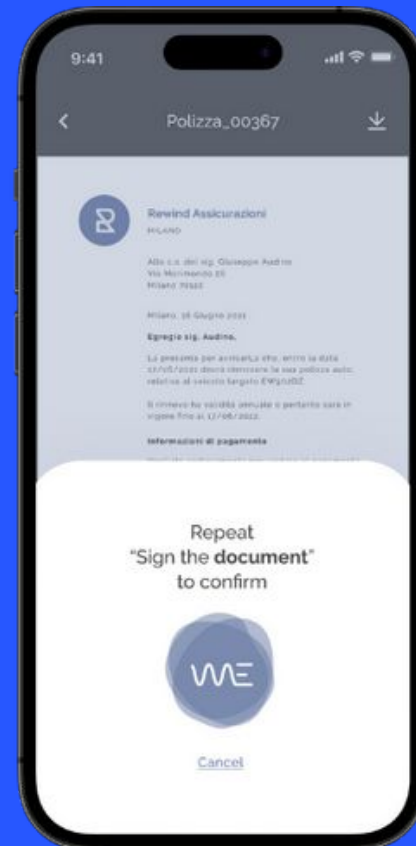

PAYMENTS AND MONEY TRANSFER

03

VoiceSign

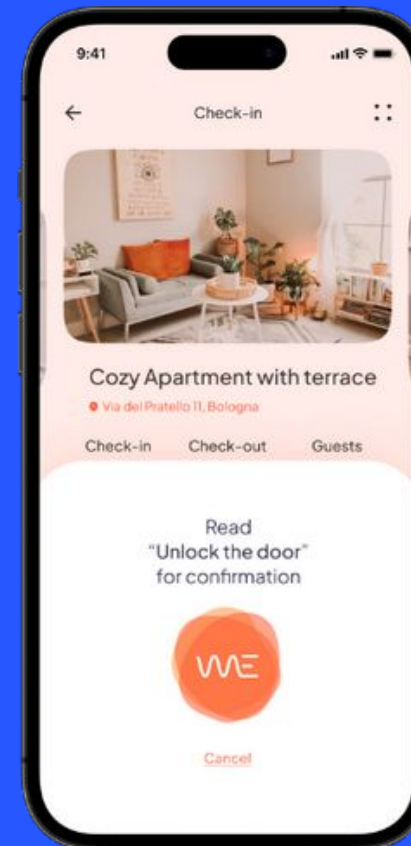

DOCUMENTS SIGNING

04

VoiceAccess

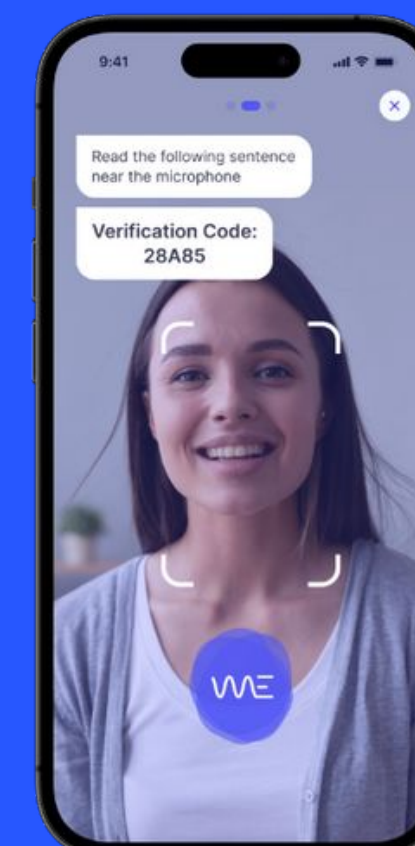

PHYSICAL PLACES ACCESS

05

VoiceOTP

IDENTITY AND ACTIONS CONFIRMATION

Why Now

Deep Fake & Data Breach Immune

During the authorisation process, VOICEME verifies:

- 1: **the device** is the one provided during the enrollment
- 2: **the voice** fingerprint
- 3: **facial** biometric
- 4: the user is repeating a sentence generated randomly (**liveness check**)
- 5: **KYC** to onboard and verify customer's documents

All checks could be made **separately** in order to implement several use cases, and to make VOICEME usable in all environments

No compromise on UX

3 seconds to Enroll

3 seconds to Authorise
